

Homework Assignment No. 1

1. Read a few of non-negative integers from standard input, use a negative integer to signify the end of inputs and print the sum of these non-negative integers. Below is a sample run

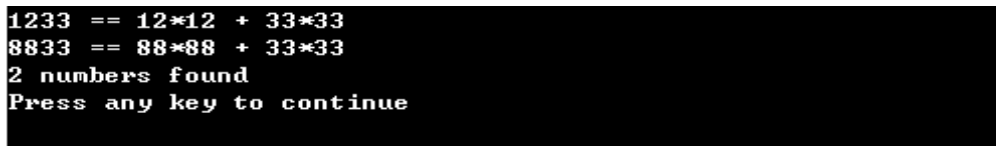

```
C:\Windows\system32\cmd.exe
Enter a squence of numbers to be summed: 1 3 4 1 6 2 -3
Sum is: 17
請按任意鍵繼續 - - -
```

2. (a) Using for loop to write a program to loop from 1000 to 9999 and output those numbers that have the following property: if you split a four-digit number into two parts, one having the first two digits and the other having the last two digits, and add the square of these two numbers, you get the original four-digit number. This is true, for example, for 1233:

1233 is the same as $12^2 + 33^2$

A sample output looks like the following:

```
1233 == 12*12 + 33*33
8833 == 88*88 + 33*33
2 numbers found
Press any key to continue
```

- (b) Rewrite the control structure using while loop.

HW Submission Procedure (請仔細閱讀):

1. You should create an independent Visual Studio 2017 project for each problem. You should submit your project folder, which includes your source codes (header and cpp files), input/output data and Visual Studio 2017 project files. To save space, please delete Debug folder and sdf before submitting your files.
繳交時請以專案資料夾區分每一道題目，資料夾中應包含該題中的每個標頭檔、cpp 檔、所讀取的資料與輸出的結果與 Visual Studio 2017 相關專案檔。繳交前請刪除 Debug 資料夾與 sdf 檔案，以節省空間。

	Debug	2014/9/18 上午 0...	檔案資料夾	
	HW1-Prob1.sdf	2014/9/18 上午 0...	SQL Server Conn...	64 KB
	HW1-Prob1.sln	2014/9/18 上午 0...	Microsoft Visual ...	1 KB
	HW1-Prob1.vcxproj	2014/9/18 上午 0...	VC++ Project	4 KB
	HW1-Prob1.vcxproj.filters	2014/9/18 上午 0...	VC++ Project Filt...	1 KB
	Prob1.cpp	2014/9/17 下午 0...	C++ Source	1 KB

HW Grading Policy:

1. You should consider about exception handling, e.g. error input, file opening fail, etc.
請注意所有例外狀況的處理，例如：錯誤的符號字串輸入、檔案開啟失敗等。
2. The coding style includes your output format.
輸出資料的格式將納入格式評分。
3. **If your code is not compilable, your score in this problem is zero (including coding style).**
若程式無法編譯，則該題以零分計算。(包含格式分數)
4. Your program will be tested with other data which is not the same as provided samples.
除了題目所提供的範例測試資料以外，作業程式碼將以額外的測試資料進行測試。

- Coding Style (20%): 編碼格式分數

1. format
整體形式與輸出資料的格式
2. comments
註解
3. readability
可讀性
4. variables naming
變數命名方式
5. typesetting
型別設定

- Functionality (80%): 功能性分數

1. run-time performance:
執行時的表現
 - 1) samples not passed -> x
範例測資錯誤 => 此部分零分
 - 2) samples passed but some tests failed -> partial
範例測資通過但是部分測資失敗 => 部份給分
 - 3) samples and tests all passed
範例測資與所有測資通過 => 此部分滿分
3. excellent method++
綜合以上，又以能展現解決問題的巧思尤佳。
